

“What we have achieved with Team Results is truly remarkable.”

**Ken Asano
President of Toyota**

Team Results runs **customised retreats** for work teams and leadership teams, aimed at practical workplace results. We stand alone in the industry through our combination of:

- A modern, proprietary, tailored experiential simulation-based approach;
- A blue-chip client base in both Government and Industry; and
- Proven, measurable business results.

Delivered benefits of our tailored programs and follow-ups include increased work **productivity**; **validation** of work teams; sustained improvements in **team dynamics**; achievement of **milestones**; ownership of **change**; maintenance of elite **performance**; and resolution of **stumbling blocks**. Our proprietary **Team Dashboard™** technology allows your desired benefits to be tracked and verified. All follow-up and reporting is included.

Clients including Toyota, IBM and CPA Australia say that our programs achieve these results better than anything else they have seen. Clients like DFAT and Victoria Police aren't allowed to endorse any supplier – but the fact that they use us speaks for itself.

In your own unique environment, we can almost certainly offer a proven combination of credible and experienced facilitators with relevant backgrounds; programs tailored to the practical outlook and high expectations in your community; and a demonstrated track record in your industry or government sector that is second to none.

The right time to make contact with us is now. We charge only for the end result, and then only if you book a retreat. Until then, you are welcome to our expertise, networks, past examples and advice. Clients have found that the earlier they make contact with us, the easier and more effective the end result can be when a need arises.
